It may have been because of this self-congratulation that the ships of the squadron, at gun-practice this morning, showed phenomenal skill in hitting the small bobbing targets. Railway managers in this territory say that in view of the fact that the movements are all by special trains, and that these trains return empty, 2 cents per mile is a reasonable and just figure. Some of the movements from the West were made or tion was so sharp that some of the roads are said to have lost money. The con-tracts with the government were made on the 2-cents-per-mile basis.
